British Sugar Joins 'New Victory Hall' Sponsor List

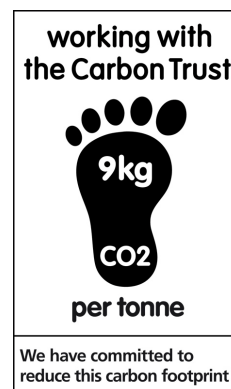

The Trustees of the New Victory Hall are delighted to announce that British Sugar has agreed to supply up to 280 tons of prime topsoil for use in landscaping the grounds of the new hall once building works are completed. The British Sugar team toured the building in early May and was so impressed with the eco-design features that they kindly agreed to donate substantial amounts of their own eco-friendly topsoil product to the project. The Trustees are very grateful to British Sugar for this very generous donation, which should help ensure that the new building is surrounded by top quality gardens, and we look forward to working with British Sugar as the landscaping takes shape.

TOPSOIL from British Sugar is the largest selling TOPSOIL in the UK. Derived from prime arable soil British Sugar TOPSOIL is sustainable, consistent, analysed and compliant to BS3882:2007.

British Sugar TOPSOIL is produced to and accredited to ISO 9001:2000, BS EN ISO 14001: 1996 and OHSAS 18001:2007.

Using the new PAS 2050 method British Sugar are the first suppliers of topsoil in the UK to calculate their carbon footprint. British Sugar's TOPSOIL has been certified as producing 9 kilograms of CO₂ per tonne of product.

Products from TOPSOIL

Landscape20 is a fully-analysed, sandy loam, BS3882:2007 complaint TOPSOIL ideal for general landscaping projects on Brownfield and Greenfield sites. Such as seeding, turfing and planting.

Sports 10 is a unique blend of sand, silt and clay, specifically developed as a cost-effective dressing for winter sports fields. Fully-analysed and free of perennial weeds this specialist product has been designed for the professional Groundsman to apply either by hand or mechanical spreader.
